Portfolio: <https://naveencivil1.github.io/cv/>

PROFILE SUMMARY

Civil Engineer with hands-on experience supporting the design and construction of civil infrastructure projects through engineering coordination, construction administration, and construction engineering. Skilled in reviewing and preparing structural drawings, interpreting specifications, coordinating with multidisciplinary project teams, & preparing technical documentation to support project execution. Experienced in construction quality assurance, project tracking, technical reporting & client coordination, with a strong understanding of engineering standards, construction practices, and project delivery. Recognized for analytical thinking, attention to detail, and the ability to translate engineering concepts into practical project solutions while driving successful project outcomes.

TECHNICAL SKILLS

Design & Modeling: AutoCAD | Civil 3D | STAAD Pro | Revit (Dynamo) | Navisworks | ETABS | Plaxis 2D

Civil Engineering & Field Inspection: Foundation & Reinforcing Steel Inspection | Structural Quality Control | ASTM & AASHTO Standards | FAA Standards/Regulations | Geotechnical Principles | Materials Inspection

Project & Construction Management: Primavera P6 | MS Project | Procore | Cost Estimation & Quantity Take-offs | Project Coordination | OSHA 30 | Contractor & Stakeholder Coordination

EXPERIENCE

Field Engineer | Terracon Consultants, Inc | Dallas, Texas- USA

Sep 2025- Present

- Review civil and structural drawings, engineering specifications, and project documents to verify compliance with design requirements, construction standards, and client expectations.
- Coordinate with project managers, engineers, contractors, and clients to resolve field issues, support construction administration, facilitate project coordination, and ensure successful project execution.
- Prepare technical reports, inspection documentation, project closeout reports, and engineering deliverables to support project execution, client communication, and regulatory compliance.
- Prepare technical reports, inspection documentation, project closeout reports, and engineering deliverables to support project execution, client communication, and regulatory compliance.
- Perform special inspections and quality assurance for concrete, post-tensioning, foundations, reinforcing steel, and earthwork in accordance with ASTM, AASHTO, and project specifications.

Construction Project Manager | AA Maintenance Services LLC | Akron, Ohio- USA

May 2025- Aug 2025

- Developed cost estimates, quantity take-offs, project schedules, and technical documentation for commercial and residential construction projects while supporting project planning and successful project execution.
- Prepared and submitted engineering drawings and permitted documents for small-scale construction projects to local authorities, supporting plan review and approval.
- Coordinated with project teams, subcontractors, clients, and municipal agencies to ensure work progressed according to approved drawings, project specifications, and schedule requirements.

Junior Civil Engineer | Sugadhi Constructions and Consultancy | India

2018 – 2019

- Assisted in preparing and reviewing structural engineering drawings, interpreting project specifications, and supporting design coordination for residential and commercial projects.
- Supported the preparation and modification of civil and structural engineering drawings, quantity take-offs, design documentation, and material schedules while coordinating with project teams to meet project requirements and engineering standards.

ACADEMIC PROJECTS

Southwood Plantation Road Realignment Project (Tallahassee, Florida)

2023

- Designed a multilane highway alignment using Civil 3D in accordance with AASHTO roadway design standards, including horizontal and vertical alignments, profiles, and corridor development.
- Prepared engineering drawings, plan and profile sheets, and quantity calculations while evaluating roadway geometry to support safe and efficient transportation design.

Analysis and Design of Residential Building (G+4) Using STAAD Pro and AutoCAD

2021

- Performed structural analysis & reinforced concrete design using STAAD Pro, plans & 3D models in AutoCAD.
- Performed structural analysis and reinforced concrete design using STAAD Pro and prepared structural drawings and 3D models in AutoCAD in accordance with applicable design standards.
- Designed structural elements including beams, columns, slabs, and foundations, and verified structural stability under applicable loading conditions.

EDUCATION

- **Masters in Project Management and Technology** | Campbellsville University | KY, USA **Jun 2023 – Mar 2025**
Key courses: Project Management, Team Management, Disaster Recovery Planning & Management, N & CM.
- **Bachelors in Civil Engineering** | JNTUH | India **Jun 2019 – Aug 2022**
Key courses: Structural Analysis, Concrete Structures, Surveying, Irrigation, Hydraulics and Transportation.
- **Diploma in Civil Engineering** | SRTIST | India **Jun 2016 – Apr 2019**
Key courses: Strength of Materials, Surveying, Quantity Surveying, Environmental Engineering, CM & CP.

CERTIFICATIONS

- Engineer-In-Training (EIT)
- Valid Driver's License, IIF rules, Smith 5 keys
- HeartSaver First Aid CPR AED Certification
- American Concrete Institute (ACI) Certification
- OSHA 30 (Occupational Safety and Health Administration)
- Construction Project Management by Columbia University (Online)
- AutoCAD, Revit, Primavera P6 & Nuclear Density Gauge

ELIGIBILITY

Eligible to work in the United States of America with valid work authorization | Willing to Relocate
